Magnum® Flexible Magnets. Imagine The Possibilities.

CAPABILITIES*

Magnetic Extrusions

- Energy range from .7 to 1.2 MGO
- Thicknesses ranging from .025 inch to .375 inch
- Widths ranging from .25 inch to 4 inches
- Profile heights up to .875 inch
- Matched pole
- RubberSteel® magnetic receptive extrusions ranging from .025 inch to .125 inch thick and 1 inch to 4 inches wide

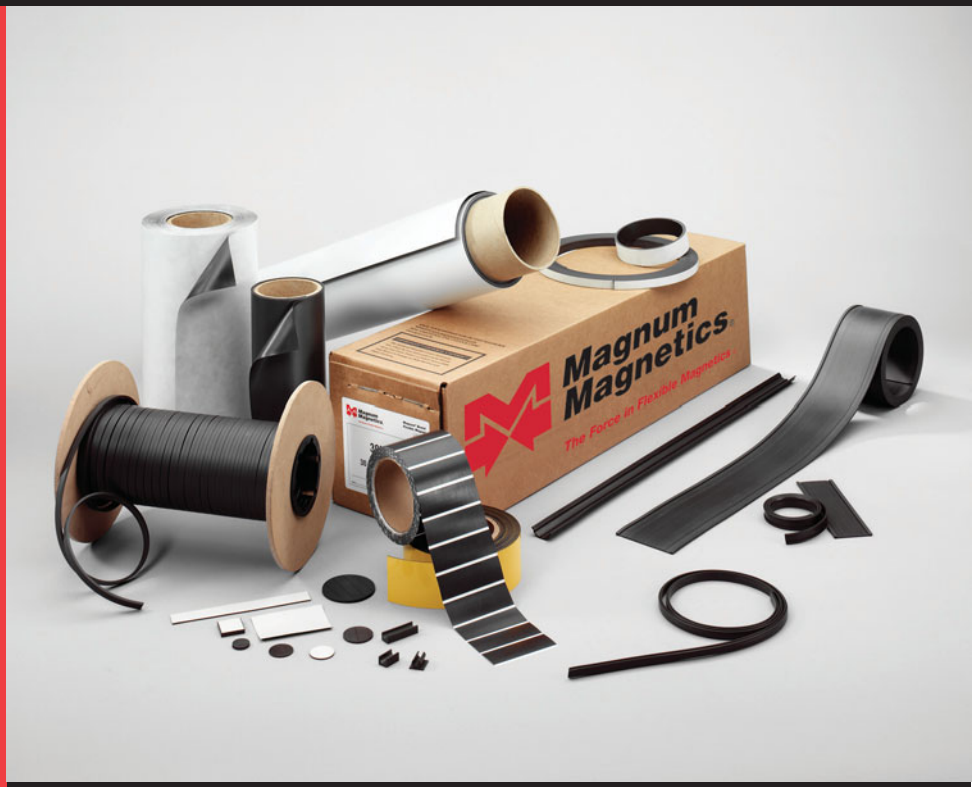
Magnetic Sheeting

- Thicknesses ranging from .008 inch to .060 inch
- Widths ranging to 27 inches
- Energy range from .7 to 1.2 MGO
- RubberSteel® magnetic receptive sheeting ranging from .015 inch to .030 inch and to 27 inches wide

General

- Precision die-cutting
- Custom magnetization and performance
- Packaged to accommodate your specific manufacturing requirements

** Stated capabilities are dependent upon millages, dimensions, laminates, and energy requirements. Call to discuss your specific applications.*



The Right Solution. Every day. **No application too difficult, no design too complex. Magnum Magnetics has earned its reputation as the industry's leader in innovation. Magnets thin enough to conform to the smallest spaces and strong enough to ensure functionality. For over a decade Magnum's research and development team has met the challenge of an increasingly demanding design and engineering market with magnetic extrusions and sheeting that open a world of possibilities. So dream, plan and build. Magnum Magnetics will make it a reality.**
