Magnetic substrate is heavier than paper.

*Thickness tolerance is +/- .002" (+/- .05 mm)

**Sheet size tolerance on length and width is +/- .015" (+/- .38 mm)

Magnetize post-press. When looking at magnetic media the question has always been how to run the material through a digital press and also have a magnetized finished product. Magnum Magnetics has the solution. Our motorized magnetizers are designed to magnetize cut sheets of Magnum[®] magnetic material and are built to order in-house based on your application. The motorized magnetizer may be installed in-line on a conveyor belt or off-line as a separate work station according to your need and preference. An optional mobile floor stand and optional feed/receiving trays are also offered. Our motorized magnetizers are low maintenance (no belts to replace), very reliable, and economical! Please ask your sales representative for more information.

Our promise. Magnum Magnetics provides superior customer service and high-quality flexible magnetic sheet, strip and custom profiles at competitive prices. That's our promise and your assurance of satisfaction from The Force in Flexible Magnetics[®].
